

CURRENT THERAPEUTIC RESEARCH

Trials From Resource-Limited Settings Call for Manuscripts

Section Eligibility

Submissions should highlight original medical and pharmaceutical research from resource-limited settings. Collaboration with local scientists from the countries in which the study was conducted is essential. All authors are expected to be full and equal partners in the design and conduct of the study, data processing and analysis, and manuscript development.

Awards

Two outstanding manuscripts will be chosen annually in recognition of exceptional efforts to conduct and report research in resource-limited settings. A reimbursement grant of \$500 will be paid to the study's senior author to aid in registration for and/or travel to a scientific or medical conference. Previous winners can be found at: www.CurrentTherapeuticRes.com/TFRLS_award.html

Submission

All manuscripts should be submitted electronically to Judd L. Walson, MD, MPH, at www.CurrentTherapeuticRes.com or to CurrTherRes@elsevier.com with "Trials From Resource-Limited Settings" in the subject line.
